What are Summoning Eggs?

Summoning Eggs are type-themed eggs that, when activated, spawn waves of Pokémon of a single type around you. Each egg corresponds to a specific type, such as Fire, Fairy, and more.

How Do They Work?

Once a Summoning Egg is used, Pokémon of the egg's type will begin spawning in your area. Your goal is to catch as many of these Pokémon as you can during the event.

Catches	Legendary Odds	Shiny Rate	Guaranteed Max IVs
10	1 in 128	1 in 500	0
20	1 in 75	1 in 350	1
30	1 in 45	1 in 200	2
40	1 in 30	1 in 100	3
50	1 in 15	1 in 20	4

End Reward

After the egg's spawns are complete, you will receive a final reward Pokémon. The more Pokémon you catch during the egg, the better your odds of receiving a Legendary as the final reward. However, the end reward is still based on chance, catching more Pokémon improves your odds but does not guarantee a Legendary.
